

At SCNS we are committed to providing a barrier-free environment which allows everyone to participate in our programs and competitions. We strive to be fully inclusive to all manner of disabilities and identities. SCNS provides the opportunity for any competitor to disclose a disability on our competition registration form.

Sometimes a competitor will require specific accommodations in order to compete and these might require a modification of competition rules and procedures. The Accessibility Services Coordinator (ASC) will be the main point of contact with the competitor and if necessary, will create an Individual Competition Plan (ICP), outlining any accommodations necessary. If competitor is to progress and compete at the National Level, the ASC forward this document to the national Director of Competitions.
